

This clever family home captures the core essence of modern design inside a traditionally styled outer layer. The living area helps define two unique outdoor living spaces which should help you soak up plenty of sun in privacy. Classic pergolas finish the look with an option to add overhead glazed cover. All bedrooms and living areas benefit from natural light positioning which make living in a home like this a dream. Work from home? No worries, this home also has an office for your convenience.

Floor Area: 234m²
